PRODUCT: CALCIUM DOBESILATE

ITEMS	SPECIFICATIONS
CHARACTERISTICS	A white or almost white hygroscopic powder
IDENTIFICATION	a) The solution shows two absorption maxima, at 221 nm and 301 nm b) A blue colour and a precipitate are immediately produced c) 2Ml of freshly prepared solution S gives reaction of calcium
SOLUBILITY	Very soluble in water, soluble in ethanol, very slightly soluble in isopropanol and practically insoluble in methylene chloride
PH	4.5 ~ 6.0
APPEARANCE OF SOLUTION	Solution S, when freshly prepared, is clear and colourless
HYDROQUINONE	≤0.1%
IRON	≤10 ppm
HEAVY METALS	≤10 ppm
WATER	4.0% ~ 6.0%
RESIDUAL SOLVENTS=>Alcohol	0.5%
ASSAY	99% ~ 102%
