

ARTICULATED BEDS=> Electric beds

❖ Trend Standard

Benefits

- Steel structure with EPOXY coating
- Electrically operated three articulations and four planes of 90 x 190 cm
- Elevation system by columns, leaving free space under the structure allowing the use of lifting systems and avoiding accumulation of dust and other residues
- Supporting capacity up to 175 kg
- Elevation from 38 up to 78 cm
- Trendelenburg and reverse Trendelenburg up to 13°
- Low voltage, end position-switch off motors:
 - 2 under the headboard and the footboard, performing elevation, Trendelenburg and reverse Trendelenburg functions.
 - 1 under the base/deck performing the articulation of the planes.
- Individual braking system
- Incorporated function control
- Integrated solid wood headboard, foot board and side rails
