

CIDOMIX PLUS DRY

Acidifier

COMPOSITION :

Pure acid formulation : Formic acid E-236, Acetic acid E-260, Propionic acid E-280, total activity 75 %.

ACTION :

CIDOMIX PLUS DRY is a feed acidifier. It lowers the buffering capacity of the feed ingredients. Its use is indicated to substitute the antibiotic growth promoters.

CIDOMIX PLUS DRY prevents intestinal infections and diarrhoea, therefore highly recommended for piglet feed at weaning.

The organic acids are not only useful to control growth of pathogenic bacteria, among them E. Coli, but also because it stimulates pepsine and pancreatic enzyme production.

CIDOMIX PLUS DRY is considered G.R.A.S., it does not produce residues in meat, milk nor eggs. It can be of great use to prevent diarrhoea during the withdrawal terms of antibacterial treatments, lactating periods and also to improve intestinal health of laying hens.

DOSE and instructions for USE :

Add CIDOMIX PLUS DRY to the final feed - homogeneous mixture.

First level :

Feed acidifier in piglet feed : 2 - 4 kg/mT

Laying hens : 1 - 2kg /mT.

Rabbits : 1kg max. 2 kg/mT.

Second level :

To replace antibiotic growth promoters : up to 8 kg /Tm in function of the feed composition (crude protein and energy).

STORAGE:

Store in a cool and dry place, protected from light.

PRESENTATION: 25 kg bags.

REGISTER No.: 25.159 – CAT
