

LEVUMIX PLUS

Nutritional aid for feed concentrates
Production stimulant for swine breeding

LEVUMIX, is a nutritional aid for sows and piglets, that increases the productivity of sows and the growth of piglets.

LEVUMIX, contains a microbial feed additive i.e. a strain of live yeast (*Saccharomyces cerevisiae*), registered at the *Institut Pasteur* of Paris, nr. I-1079. It conforms to the European regulation on feed additives (Directive 93/113/EC).

LEVUMIX, is compatible with any other feed additive present in compound feed (antibiotics, mould inhibitors, mycotoxin sequestrants, antioxidants).

COMPOSITION

SACCHAROMYCES CEREVISIAE (C.N.C.M I-1079)	1000.10 ⁹	CFU
PP-AGE Complex	100	g
Orange extract appetizing aroma	50	g
VEGETABLE EXCIPIENT AD	1000	g

DOSAGE :

SOWS: 1 kg/Tm of feed during gestation and lactation.

PIGLETS: 1,300 kg/Tm of feed.

INSTRUCTIONS FOR USE.

Blend the product thoroughly into the feed or ration concentrate.

EFFECTS AND RESULTS IN SOWS AND PIGLETS.

- Increase of the total number of weaned piglets.
- Less weight loss during lactation in sows.
- Improvement of the general physiologic conditions of sows.
- Reduction of M.M.A. problems.
- Improvement of the intestinal transit.
- Reduction of the non-fertile period between weaning and mating.
- Prolongation of the sows' reproductive status.
- Increase of piglet weight at birth.
- Higher weight at weaning.
- Reduction of the mortality rate.
- Increase of the average weight gain in general.

PRESENTATION: 20 kg packs.
