

OLKOMPLEX

Liquid Feed Ingredient Additive

COMPOSITION :

Intensified action of E-240 and E-280 stabilized at	440	g
Feed additives *		
Surfactants and emulsifiers up to	20	g
* <i>Formaldehyde and Propionic acid</i>		g
Excipient ad	1 000	ml

FEATURES :

OLKOMPLEX is a product that develops bactericide properties to protect the raw materials intended for animal nutrition and compound feed rations against bacterial contamination, particularly against Enterobacteriaceae.

A secondary fungicide effect is developed and so mycotoxin production inhibited at an early stage. Detrimental fermentation processes are blocked, consequently material clotting and nutrient loss is controlled and reduced to none, if the product is applied properly.

The principal goal of research during the product development of OLKOMPLEX was to intensify the bactericide activity of its principal ingredients; simultaneously attention to the physio-chemical characteristics was paid in order to obtain a liquid additive, easy to handle and safe for the animals and environment.

The product is non-corrosive under normal - ambient - circumstances.

DOSE

In piglet feed, milk re-placers, up to the age of 6 months at the rate of 0,5 - 2 Kg/MT. One ml of Olkomplex adds 300 mg of formaldehyde per Kg of feed. Do not exceed the total dose of 600 mg/Kg feed. (Equivalent to 2 liters /MT in case OLKOMPLEX would be the only source of formaldehyde.)

Raw materials : 0,5 a 2 kg / Tm.

Fish and meat meals with high risk indicators : up to 4 kg/MT

STORAGE:

Keep in a cool and dry place, well closed, protected from light.

Avoid exposure to external moisture and heating points.

PRESENTATION : 5L jars, 220L cans, 1000 L. containers.
