

## PANDOX PREMIX

Premix Antioxydant

### COMPOSITION :

Ethoxyquin (E-324)	.....	100	g
B.H.T. (E-321)	.....	50	g
Citric acid (E-330)	.....	50	g
Carrier ad .	.....	1 000	g

PANDOX PREMIX is indicated to block the oxydation process in all feed compositions destined to poultry, swine, ruminants and pets.

### INSTRUCTIONS FOR USE :

Blend homogeneously with the feed, vitamin premixes, meals and sub-products for animal nutrition.

*Due to its high concentration, PANDOX PREMIX is especially indicated for those ingredients that have a high oxydation risk or for those products for which a large storage term is predicted. For regular feed protection, Pandox R Premix is indicated*

**DOSE:** The recommended dose is established at 125 g/Tm. This dosage rate may be increased in function of the oxydation risk or required storage term. The maximum dose in feed is 1 kg/Tm.

**STORAGE:** Store in a dry and cool place, protected from light.

**PRESENTATION :** 25 kg aluminium packs.

**REGISTER No:** 1909 - CAT
